Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-60 (cancelled)

Claim 61 (previously presented): An electronic device comprising:

a display located on a first side of said electronic device;

a navigation sensor located on a second side of said electronic device, said second side being opposite said first side, wherein said navigation sensor detects movement of a part of a user relative to said navigation sensor located in close proximity to said navigation sensor, and wherein an image displayed on said display is altered in response to said movement of said part of said user relative to said navigation device.

Claim 62 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by moving an image of a cursor.

Claim 63 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by panning a second image displayed on at least part of said display.

Claim 64 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by scrolling a second image displayed on at least part of said display.

BEST AVAILABLE COPY

Claim 65 (previously presented): The electronic device of claim 61 wherein said image displayed on said display is altered in response to said movement by showing a different part of a second image, at least part of which is displayed on at least part of said display.

Claim 66 (previously presented): The electronic device of claim 61 further comprising:
a first button, whereby said movement of said part of said user and said first button may be operated in cooperation to mimic at least one function of a computer mouse being used with a graphical user interface.

Claim 67 (previously presented): The electronic device of claim 66 wherein a graphical user interface is being displayed on said display.

Claim 68 (previously presented): The electronic device of claim 66 further comprising:
a second button, whereby said movement of said part of said user, said first button, and said second button may be operated in cooperation to mimic more than one function of a computer mouse being used with a graphical user interface.

Claim 69 (previously presented): The electronic device of claim 68 wherein a graphical user interface is being displayed on said display.
